DIRECTORS' REPORT

Dear Shareholders,

Your Directors are pleased to present the Twenty-third Annual Report, together with the Audited Accounts of the Company for the year ended 31st March, 2010.

1. FINANCIAL HIGHLIGHTS

The financial performance of the Company for the financial year ended 31st March, 2010 is summarised below: -
(Rs. in Lacs)

	Financial Year 2009-2010	Financial Year 2008-2009
Gross Income	4538.55	2132.01
Profit/(Loss) before Interest and Depreciation & Extraordinary item	204.62	233.34
Less : Interest	25.06	52.60

Add/Less: Exceptional item (Provisions/Balances Written Off/Back)	6.36	12.77
Net Profit/(Loss) for the year after Extraordinary item	76.62	68.63
Less : Taxes	-	1.44
Net Profit/(Loss) for the year after Tax	76.62	67.19

2. a) RESULTS & OPERATIONS:

The Company's turnover for the year was Rs. 4538.55 Lacs against Rs. 2132.01 Lacs in the previous year, registering an increase by 113%. Essentially because of more than optimum capacity utilization of Ethyl Acetate Plant. The Net Profit after tax was Rs. 76.62 Lacs for the year under review, as compared to Rs.67.19 Lacs in the previous year.

As you are aware, the performance of the Ethanol and Ethanol based chemical industry is to some extent dependant on performance of the sugar sector as the raw material for this industry namely Molasses and Alcohol are derived from sugar industry. The sugar production during season 2008-09 (October to September) was lower by more than 40% compared to earlier season. Due to the lower sugar production, the prices of Ethanol went up by over 50% during this year. However, the prices of the finished products manufactured by the Company could not increase due to the recessionary impact on the chemical industry and especially on the chemicals manufactured by the Company. The prices infact were lower during current year vis-a-vis previous year.

The sugar production during season 2009-10 (October to September) has shown substantial improvement and is expected to be around 19 million M.T. against 14.6 million M.T. of previous year. The production during season 2010-11 is also expected to rise substantially. This would improve the availability of Molasses and Alcohol during financial year 2010-11. We also expect raw material prices to come down during 2010-11. This would result in improved profitability of the Company in 2010-11.

2. b) CAPITAL EXPENDITURE:

i. Boiler:

The Company has successfully commissioned coal fired boiler and it has been operating satisfactorily during the year under review. Due to this, there is saving of over 20% in cost of steam generation. During the year, the company has also installed variable frequency drive controls on the boiler, which has resulted in the saving in power to the tune of 1000 KWH/day.

ii. Back Pressure Steam Turbine:

The Company has installed and commissioned one 600 KW Back Pressure Steam Turbine during February, 2010. However, the benefits of this turbine would be available during the year 2010-11.

iii. Raw Material & Finished Goods Storage Tanks:

The Company is also augmenting storage tank capacities for raw material & finished products. This would improve the competitiveness in the procurement of raw material as well as marketing of chemicals produced by the Company.

iv. Acetic Anhydride:

The Company has been exploring various options for diversification and adding new products for sustained growth over the years. The Board has now narrowed down the choice and decided to go ahead with the project to manufacture Acetic Anhydride. This product is used as drug intermediate and raw material in various industries. There are many derivatives of Acetic Anhydride or its intermediate products, which would provide further opportunities for diversification. Acetic Anhydride also provides synergy in terms of raw material as well as market. The Company plans to commission this project during second half of 2011.

3. MANAGEMENT DISCUSSION AND ANALYSIS

Industry Structure and Developments

Your Company essentially manufactures chemicals, which use Ethanol as feedstock. Ethanol in India is manufactured from Molasses-byproduct of sugar industry. The availability and prices of Molasses and Ethanol depend upon the production of sugar. Sugar industry goes through cyclical fluctuation, which also largely affect the availability and prices of Ethanol. Sugar industry is currently poised for upswing during the next two years. This should improve

availability and prices of Ethanol in India. Your company also uses Acetic Acid, which either can be manufactured internally or could be bought locally or imported from international manufacturers. The availability of Acetic Acid is expected to be comfortable and therefore prices are also expected to be stable during next 12 months.

Opportunities and Threats.

The demand for Ethyl Acetate, which is main product of the Company, is growing @ over 7% p.a. and we are confident that we will be able to market the products in the local and international market. With the improved availability of the raw materials, the Company is also exploring opportunities for other products for sustained growth.

Since the availability and price of Ethanol largely depends upon the performance of the sugar industry, cyclical fluctuation in the sugar industry would affect Ethanol industry as well.

Segment wise and Product wise performance:

Your Company has been manufacturing chemicals like Acetaldehyde, Acetic Acid and Ethyl Acetate. During the last year, due to the poor availability of Ethanol locally, the price of Ethanol was very high, which made production of Acetaldehyde and Acetic Acid unviable. Therefore, the Acetaldehyde plant operated intermittently while Acetic Acid plant remained closed. However, we expect that with the improved availability of Ethanol during year 2010-11, the Company will be able to operate Acetaldehyde plant in 2010-11.

Purchase of Acetic Acid continued to be more competitive than own production of Acetic Acid from Ethanol. Hence, your company expect Acetic Acid plant to be non-operational in the year 2010-11. Ethyl Acetate is the main product and drives more than 90% of the revenues of the Company. The Company has done de-bottlenecking of the plant capacity, which effectively has increased its operating capacities to over 120% of the rated capacity.

Ethyl Acetate manufactured by the Company meets stringent norms of various industries namely pharmaceuticals, paint industry & packaging industry and enjoys wider acceptance. Your company expects to improve its performance during 2010-11 of Ethyl Acetate.

Risks and Concerns:

The chemical industry is prone to fluctuations in demand depending upon the performance of the user industry. The demand for Ethyl Acetate is also subject to the fluctuations based on the performance of the user industry. Due to recessionary conditions in the chemical industry world wide, your company expects this to have impact on the prices of chemicals in India also. Your company is trying to minimize the impact by closely monitoring operating parameters as well as procurement of raw materials at competitive prices.

Internal Control System:

Your Company has adequate internal control system including suitable procedures commensurate with its size and the nature of the business. The internal control systems provide for all documented policies, guidelines, authorization, and approval procedures. Internal Audit is being carried out throughout the year in areas such as Income, Expenditure, Financial Accounting and Statutory Compliances. The primary objective of such audit is to test the adequacy and effectiveness of all internal controls laid down by the Management and to suggest improvements.

Financial performance with respect to operational performance:

Your Company's turnover during the financial year ended 31st March, 2010 has increased to Rs. 453,204,438 as compared to Rs. 213,044,330 during the corresponding last year. The Company has posted Profit Before Interest and Exceptional Items for the year ended 31st March, 2010 is Rs. 7,026,175 as compared to the profit of Rs. 8,139,582 in the corresponding last year. Net Profit After Tax is Rs.7,662,499 as against a profit of Rs. 6,718,957 in the corresponding last year.

Human Resources

Skilled professionals in all its operations are basically its human resource assets and are integral part the Company's ongoing successes. They have played significant role and enable the Company to deliver better performance.

Cautionary statement

Certain statement in the management discussion and analysis may be forward looking within the meaning of applicable securities laws and regulations and actual results may differ materially from those expressed or implied. Factors that would make differences to Company's operations include competition, price realisation, changes in government policies and regulations, tax regimes, economic development and other incidental factors.

4. STATUS UNDER BIFR:

The Company had filed Miscellaneous Application to the Board for Industrial & Financial Reconstruction (BIFR). In the hearing held on 14th October, 2009 before the Hon'ble Bench-I of BIFR, wherein it was stated that the Company had substantially implemented the sanctioned scheme issued by BIFR and the Net-worth of the Company has become positive. The Company has therefore ceased to be a sick industrial undertaking within the meaning of Section 3(1)(o) of SICA. The Hon'ble Bench has therefore discharged the Company from the purview of SICA/BIFR and accordingly the Company was deregistered from BIFR.
